SUMMARY

Full-stack developer who genuinely enjoys breaking things down to first principles and building them back up better. Passionate about backend architecture, low-level Android internals, and shipping clean, performant code. Always tinkering – whether it's locking modems to 5G bands or designing JWT-secured REST APIs from scratch.

EXPERIENCE

Hexaware Technologies <i>Premier Graduate Engineer Trainee – Java Full Stack & React</i> – Training in Java Full Stack and React under Hexaware's Premier Graduate Trainee program; building commercial projects with Spring Boot, REST APIs, and React in an Agile environment.	Chennai, India 2025 – 2026
---	-------------------------------

EDUCATION

Sri Manakula Vinayagar Engineering College <i>B.Tech in Computer Science – CGPA: 8.48</i>	Puducherry, India Aug 2021 – May 2025
Seventh Day Adventist Higher Secondary School <i>HSC (12th Grade) – 93% SSLC (10th Grade) – 95%</i>	Puducherry, India 2019 – 2021

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript, SQL
Frontend: HTML, CSS, React, Angular
Backend: Spring Boot, REST APIs, JWT Authentication
Mobile: Android Studio (AOSP)
DevOps & Cloud: Docker, AWS Cloud, Git
UI/UX & DB: Figma, Adobe Express, Photoshop, MySQL

PROJECTS

Hotel Booking System <i>Java, Spring Boot, JWT, REST API, MySQL, Docker</i> – Built a full-stack hotel booking platform with role-based access (Admin/Staff/Guest) using Spring Security, JWT, RESTful APIs, and JPA/Hibernate with MySQL. – Containerized with Docker Compose for consistent multi-environment deployment.	2025
Neighbor Connect – Public Services Application <i>Flutter, Android, Firebase</i> – Led UI/UX design and frontend development of a Flutter-based Android app connecting citizens with government officials to resolve municipal issues in real time. – Translated Figma prototypes into responsive widgets; implemented issue-tracking workflows for submission, monitoring, and status updates.	2024
5G Band Locking Tool – Android Modem Configuration <i>Android, ADB, Qualcomm AT Commands</i> – Built a tool using ADB shell and Qualcomm AT commands to modify Android modem NV memory variables, forcing Snapdragon modems to lock onto a 5G NR band – achieving consistent 5G SA/NSA connectivity with measurable bandwidth gains.	2026

CERTIFICATIONS

AWS Academy Graduate – AWS Cloud Foundations | *Amazon Web Services*
CCNA: Introduction to Networks | *Cisco Networking Academy*
IT Specialist – JavaScript | *Pearson VUE / Certiport*
